

TABLE OF CONTENTS

PREFACE	1
1 FRAME CONCEPT	4
1.1 INTRODUCTION AND OBJECTIVES	4
1.2 SITUATION, PROBLEMS AND KNOWLEDGE DEFICITS	5
1.2.1 Ecological situation in the Elbe catchment area	5
1.2.1.1 Flowing waters	5
1.2.1.2 Flood plains	6
1.2.1.3 Catchment area	7
1.2.2 Socioeconomic situation in the Elbe region	8
1.2.3 Knowledge deficits from the perspective of the Federal States in the Elbe catchment area	9
1.3 STRATEGIES AND INSTRUMENTS FOR ECOLOGICAL DEVELOPMENT	11
1.3.1 Development of ecological <i>Leitbilder</i>	11
1.3.2 Determination of the environmental capacity of cultivated and pristine landscapes	12
1.3.3 Forecast of the possible consequences of interventions	13
1.3.4 Proposing measures	13
1.4 PRIORITY RESEARCH TASKS	13
1.4.1 Ecology of flowing waters	13
1.4.1.1 Ecomorphology	14
1.4.1.2 Structure-bound turnover processes	15
1.4.1.3 Species and biocoenosis	15
1.4.2 Ecology of the flood plains	16
1.4.3 Land use in the catchment area	18
1.5 IMPLEMENTATION AND FUNDING OF THE RESEARCH CONCEPTION	19
1.5.1 Funding conditions	19
1.5.2 Tasks and functions of the Elbe Ecology Project Group	20
1.5.3 Application procedure	21

2	SUBCONCEPT "ECOLOGY OF FLOWING WATERS"	23
2.1.	ECOMORPHOLOGY	23
2.1.1	Introduction and objectives	23
2.1.2	Problems and knowledge deficits	23
	2.1.2.1 Dynamics of runoff and morphology	24
	2.1.2.2 Hydraulic engineering measures	25
	2.1.2.3 Interfaces with other issues	26
2.1.3	Priority research tasks	26
	2.1.3.1 Problem-orientated assessment of available research findings	26
	2.1.3.2 Development of ecological <i>Leitbilder</i>	27
	2.1.3.3 Development of instruments for analysing the morpho- dynamics and predicting the impacts of interventions	28
2.2	DYNAMICS OF MATTER	29
2.2.1	Anticipated research tasks	29
2.3	SPECIES AND BIOCOENOSES	30
2.3.1	Fish fauna	30
	2.3.1.1 Introduction and objectives	30
	2.3.1.2 Problems and knowledge deficits	31
	2.3.1.3 Research priorities	32
	2.3.1.3.1 Problem-oriented assessment of available research findings	32
	2.3.1.3.2 Development of ecological <i>Leitbilder</i>	32
	2.3.1.3.3 Biocoenotic studies	33
3	SUBCONCEPT "ECOLOGY OF THE FLOOD PLAINS"	36
3.1	INTRODUCTION AND OBJECTIVES	36
3.1.1	Flood plains and their threat	36
3.1.2	Situation of the Elbe flood plains	37
3.1.3	Objectives	38
3.2	PROBLEMS AND KNOWLEDGE DEFICITS	39
3.2.1	Structural diversity and biocoenosis	39
3.2.2	Assessment of the ecological status of the flood plains and river-bank structures	40
3.2.3	Changes in water budget	40
3.2.4	Ecological flood protection	40
3.2.5	Gravel mining	41
3.2.6	Agricultural use	41
3.2.7	Further issues of concern	42

3.2.8	Interfaces with other issues	42
3.3	PRIORITY RESEARCH TASKS	42
3.3.1	Problem-oriented evaluation of available research findings	42
3.3.2	Relations between river and flood plain	43
3.3.3	Development of ecological models	43
3.3.4	Assessment and bioindication	44
3.3.5	Management concepts	44
3.3.5.1	Gravel mining	45
3.3.5.2	Flood retention and flood plain renaturation	45
3.3.5.3	Farming in the inundation area	45
4	SUBCONCEPT "LAND USE IN THE CATCHMENT AREA"	48
4.1	INTRODUCTION AND OBJECTIVES	48
4.1.1	Flowing waters and their catchment area	48
4.1.2	The Elbe catchment area	48
4.1.3	Objectives and approaches	49
4.2	PROBLEMS AND KNOWLEDGE DEFICITS	50
4.2.1	Water budget and mass balance of the landscape	50
4.2.2	Indication and assessment of interventions in the morphology of the landscape	51
4.2.3	Obstacles to implementation	51
4.3	PRIORITY RESEARCH TASKS	52
4.3.1	Problem-oriented evaluation of available research findings	52
4.3.2	Classification of the catchment area	52
4.3.3	Development of ecological models	53
4.3.4	Research in model projects	54
5	APPENDICES	
Appendix 1:	Priority research tasks and their time sequences	57
Appendix 2:	Interfaces of priority tasks	58
Appendix 3:	The River Elbe and the Elbe catchment area	59
Appendix 4:	Institutions relevant to the research conception	60
Appendix 5:	Selected literature relevant to the research conception	62
Appendix 6:	Information for drafting the project outlines	64
6	ACRONYMS AND ABBREVIATIONS	65
